# Roof-Top Unit (RTU) Incentive Program

## OPPD offers incentives to commercial and industrial customers to make their RTU more energy-efficient.

Roof-top units (RTUs) are used for heating, cooling and ventilation. Recently, upgrades have been developed to make RTUs 28 to 68 percent more energy-efficient, while maintaining occupant comfort.

OPPD now offers incentives for upgrades added to existing RTUs by a qualified Trade Ally. RTU upgrades will result in your RTU operating more efficiently, saving you energy and money.

Through additional incentives offered by the reEnergize Program, the cost of the upgrades will be at a projected simple payback of one year.

### The Process

- » Visit [oppd.com/RTU](http://oppd.com/RTU) to view a list of Trade Allies.
  - » Work with the Trade Ally to determine your needs.
  - » Complete the preapproval process with your Trade Ally. The Trade Ally will submit the following:
    - RTU Incentive Program application
    - W-9 form for Trade Ally
    - RTU Pricing, Savings Estimator and Invoice Worksheet
  - » The Trade Ally will install the device(s). Installations must be completed within 90 days of preapproval.
  - » Submit an itemized invoice to OPPD within 30 days of project completion.
- Start enjoying your energy savings!**
- \* You must work with a Trade Ally to receive the incentive. Terms & Conditions at [oppd.com/RTU](http://oppd.com/RTU).*

## reEnergize Program Incentives

For a limited time, commercial and industrial buildings that are 20,000-square-foot or less may also qualify for additional incentives from the reEnergize Omaha Program. Incentives include:

- » Energy-efficient screw-in replacement LED light bulbs for your facility
- » Incentives, in addition to OPPD's RTU incentives, to pay down the cost of Digi RTU Optimizer upgrades to a projected one-year simple payback
- » Up to 30 hours of consultation from a Sustainability Advisor

Incentives through the reEnergize Program end May 2013. To learn more about these incentives, visit [reenergizeprogram.org/commercial](http://reenergizeprogram.org/commercial) or call toll-free 877-402-5111.

*\* Incentives associated with the reEnergize Program must be preapproved by OPPD prior to any work being completed in order to ensure incentive funding.*
