

## Bes-Tech Helps Client Secure \$346,000 Rebate

May 02, 2016  
Tulsa, Oklahoma

Hillcrest Medical Center of Tulsa, OK recently became the recipient of a \$346,000 rebate check and Project of the Year Award from its local electricity provider. Both the check and award were made possible thanks to the significant energy savings achieved as a result of a campus-wide heating, ventilation, and air-conditioning (HVAC) optimization project performed by Bes-Tech, Inc. and the hospital's facility management team.

The incentive check given to Hillcrest Medical was the highest ever awarded by the Public Service Company of Oklahoma (PSO), an AEP affiliate. Bes-Tech's work at Hillcrest was a contracted project with CBRE, a global leader in facility management. Bes-Tech's involvement in the project included major retrofits to the building automation system (BAS) and upgrades of HVAC equipment in the hospital's central utility plant, as well as the implementation of a systematic HVAC optimization process in several large buildings on campus.

The project ran from November 2014 to October 2015. It is projected based upon data collected from utility bills in the months following the completion of the project that Hillcrest is set to achieve an annual utility costs savings of \$330,780. (This savings is in addition to the savings from the rebate).

Bes-Tech has been a leader in energy efficient building systems technologies for the past twelve years. The company was founded on proven scientific engineering processes and technologies that reduce peak energy demand, minimize energy usage, and maximize energy efficiency. They actively work to lower the carbon footprint of the built environment.

For additional information about the HVAC optimization process, please contact Bes-Tech's Customer Service at 402-502-2340.
