

Announcement: Bes-Tech Partners with Service Logic

Bes-Tech, Inc. is proud to announce a collaborative partnership with Service Logic in promotion of Bes-Tech's Digi-RTU®. Bes-Tech is a building energy solutions and technology company committed to reducing energy demand and consumption through innovative technology solutions. Through the addition of the Digi-RTU® to their product line, Service Logic seeks to expand their customer base while remaining committed to providing excellent customer service and ensuring their customers' satisfaction.

The Digi-RTU®, a rooftop unit controller developed by Bes-Tech for rooftop unit retrofits, is an industry proven Advanced Rooftop Control (ARC) solution. It is designed for rooftop units of at least 3-tons, heat pumps, and split units. AirTight FaciliTech, Inc., a Service Logic Company, installed the Digi-RTU® in their Charlotte, NC facility and monitored it throughout the summer of 2016 as part of an independent evaluation. The measured and verified results showed that the Digi-RTU® significantly reduced the amount of energy consumed in the facility. AirTight Facilitatech and others involved in the study concluded that the Digi-RTU® is a viable solution for rooftop unit retrofits.

The Digi-RTU®:

The Ultimate Solution for Rooftop Units: The Digi-RTU® is a single, cost-effective solution for RTUs of at least 3-tons in size. It can be employed in all climate zones and is able to (1) minimize peak demand and energy consumption, (2) reduce O&M costs and extend the life span of system equipment, and (3) improve the thermal comfort and humidity within a space.

Key Facts about the Digi-RTU®:

The Ultimate Solution for Rooftop Units: The Digi-RTU® is meant for DX-cooling units of at least 3 tons. It can be applied to a variety of DX-cooling units including RTUs, CRAC units, air/water-source heat pumps, and split units. It is also suitable for use in a wide variety of building types.

24/7 Technical Support: **Bes-Tech guarantees energy savings that last.** In order to ensure this guarantee, the Digi-RTU must be installed and serviced correctly. All Digi-RTU® installers receive 24/7 technical support and virtual onsite supervision. Our installers are also required to obtain certification through mandatory in-house or on-site training.

Guaranteed customer satisfaction: Excellent, timely, and comprehensive customer support is available for all product lines.

About Service Logic

Since 1945, the Service Logic companies have developed long-term client relationships by consistently delivering exceptional services. Service Logic evaluates, designs, installs, and maintains building mechanical systems. Their programs are customized to maximize building energy efficiency, reduce operational and maintenance costs, and improve the overall performance of mechanical systems.
